

Canadabred[®]

CANADABRED COMPLETE

Your program for success

Canadabred Complete is your full-service source for top quality swine genetics. We can supply high health breeding stock in the volume you need.

Our animals are available from 10 kg weaners and larger. All are verified in a regular health monitoring program by the Canadabred veterinary team.

Thorough genetic evaluation

All Canadabred genetic evaluations are performed through the Canadian Centre for Swine Improvement (CCSI). CCSI is home to the largest genetically connected nucleus in Canada, ensuring a diverse source of superior genetics.

Further information can be found at www.ccsi.ca.

Physical conformation

All Canadabred gilts and boars are selected for superior conformation traits:

- Feet, legs, toes
- Underlines
- Overall structure.

All Canadabred purebred gilts and boars are required to be evaluated through CCSI. Selection is based on:

- Productivity and sound conformation
- Increased longevity
- Increased lifetime production.

Terminal genetics

All Canadabred Sire Lines are evaluated through CCSI. Selection is based on:

- Lean yield and growth
- Consistency through reduced variability.

Comprehensive sales and service support

Canadabred delivers custom selection based on your operation's needs. We provide 100% transparency of our health monitoring and reporting, genetic evaluation and pedigrees.

Complete production and technical support are available to ensure our genetics deliver results in your operation.
